Audio and Video Production Charges January 2, 2011

1. **Vocal Deletion** - A vocal deletion is accomplished by playing your CD or Vinal Record like an album or 45rpm record into our computer and support equipment and adjust so that the lead vocal only is reduced or deleted and then recorded onto another CD. This service costs \$15 if the process works well enough for the client to use. We do this by appointment so that the client can make the decision if the process is acceptable. If the process does not work well, there is no charge for trying. If you choose to just leave the work to be done with us, we will make the determination of whether the deletion is one that will be satisfactory and charges will be applied if we do the work.
2. **Key Change** - we can change the key that a song is in digitally and not change the speed of the song. Most songs can be changed up or down by 2 full steps without much change in the quality of the sound. We do not recommend changing any more than 2 steps because the background vocals usually sound like "The Chipmonks" or "Darth Vader". The charge for this service is \$15 and we put the final product on a CD. If doesn't change the CD or record that you bring, we simply play it into our system and then do the change and record it onto a new CD.
3. **Editing or Shortening Songs** - In this process we play the song or songs into the system and edit the material on our computers to edit the material such that it sounds like it was recorded that way originally without any skips, pops, or glitches where the material was edited. The charge for this service usually runs between \$25 to \$45 depending on how long and how many edit points there are to be done. For singers we recommend that you know where the edit points are before your arrival at the studio. If you want to take out a verse or chorus or move them around, it will help us know what to do and save you money.
4. **Change Format Of Recorded Material** - This is a service that we offer to transfer cassette tapes, LP Albums, 45's, Audio from mini recorders or the small digital recorders, audio from VHS video tapes, minidisks, Dat tapes, ADAT master tapes, Reel to Reel tapes, and up to Master 1 inch Tapes from recording studios that were recorded from the 50's until present day. The charges for a single 45 to a CD is \$10, for a standard 33 1/3 Album is \$15, and the rest is done on a \$20 per hour plus a \$5 CD burn of material from most other formats. We will always be happy to estimate the total cost of a project before we do the work if you request. Many Reel to Reel tapes can be quite long and can be costly to transfer to CD, so we always recommend that we give you an estimate on these items.
5. **Download or Sell Karaoke Songs** - In most cases we can download popular songs that you might hear on the radio in karaoke format. The material is usually in the same key and tempo of the original artists version, but in some cases it may vary. Our distributors usually have a small sample of the song available as a sample for you to hear. If you have any doubts that you can sing it in the key of the original artist, we can download the sample for your approval before you purchase the track. The charge for the track is \$15 per song and we put it on one of our Cds, please do not bring a CD for us to record on, we use our own that works best with our equipment and is included in the \$15 cost. If the demonstration

- 5.(cont) version is available, we will add it for \$5 extra for a total of \$20 on one CD. If the client would like to have the demonstration and it is not available from our karaoke distributors, we can download it from an original artist full version distributor and put it on the CD, and the cost will be \$15, just as the karaoke version, for a total of \$30 for the project.
6. Recording A Vocal Using Karaoke Songs - We can record your voice as you sing with the karaoke song in our recording studio for a charge of \$35, which includes the recording and a Master CD of the recording. We do this in multitrack mode, which means that we can fix a mistake in the vocal track without having to record the whole track again. We simply have the client sing along with the song at that particular part of the song and will “overdub” the new (hopefully correct) vocal over the bad one that and it will sound like it was recorded that way originally. We can make CD copies of the Master CD for \$5 each.
7. Recording The “Just For Fun” Karaoke - This is a direct to Master CD recording, which means that we record exactly what you sing directly to the CD without fixing any mistakes that are made during the recording process. The charge for this service is \$15 per take. If the client would like to re-record the song again or stop and do another take there will be a \$15 charge for each take of each song being recorded. We recommend that this type of recording be limited to non-critical, just for fun recording because it can get very expensive if you have to start again or re-recording the song.
8. Special Event Music CD - These are Cds that we create from either your Cds or tapes or can download songs for special events such as Weddings, Anniversaries, Funerals, Family Reunions, Company Parties, etc. The charges for these projects is based on \$20 per hour that we are actually working on the project and \$10 per song that we have to download that is not supplied by the client, plus \$15 for a Master CD of the project in the order that the client determines. We can make copies of the CD for \$5 each.
9. Printing on Cds or DVDs - We can print just about anything on the CD or DVD itself, such as Artist Name, Songs, DVD content, Family Name, Company Logos, Artist or Family Pictures or we can design a special print at clients preference for a charge of \$35 per hour that we are actually working on the design. The standard cost for a “Text Only” design is a one time fee of \$35 plus \$1 each to print the design onto the CD or DVD. Each added color besides black is \$5 more per color for the initial design and .25 cents extra per print. There is a set charge of \$20 each for Full Color Pictures or Company Logos, and \$10 each for black and white (grayscale) items. If the client is ordering 100 or more copies of the project, then we will give a discount to be determined by Charles Baker.
10. Video Demo Projects - Many singers or artists need to make a video demo to send to American Idol, Nashville Star, Booking Agents, Venues, etc. We record these artists in a live performance of each song for \$75 per song, plus \$15 for the Master DVD. We add the artists’ name, title of the song, and where it was recorded (Baker Productions Logo) to the bottom left of the screen just like you see on MTV or CMT on the music videos and is included in the \$75 per song charges. We can make DVD copies for \$15 each and printing charges apply as above if the client would like to have printing on the product.
11. Video Studio Services are available both in studio and on location. We have a Mobile Recording Studio Truck with up to 4 cameras and 24 track of audio. In studio charges are \$65 per hour per camera plus media. Editing is also \$65 per hour with masters available in most all formats.
